

RECOMMENDATIONS FOR CLOSE CONTACTS

CLOSE CONTACT INCLUDES LIVING WITH OR HAVING SPENT 4 HOURS OR LONGER WITH SOMEONE WITH COVID-19.

If you are a close contact, there are important things you can do for the next 7 days to reduce the risk to others:

- **Close contacts are at an increased risk of getting COVID, so monitor for symptoms. If you get sick you should get tested and stay at home until you are well.**
- **Rapid antigen tests can pick up infection early even if you do not have symptoms. It is safest to do one each day.**
- **If you are a close contact with no COVID-19 symptoms, you can access free rapid antigen tests from RAT Collection Points across the state.**
- **Don't visit people at high risk of severe illness, or anyone in a hospital, or an aged or disability care facility. If you have to visit, do a rapid antigen test before you go.**
- **Wear a mask when in indoor places and on public transport.**
- **Notify your employer, school or childcare setting that you are a close contact.**

If you need health care it is best to call your service first and let them know you are a close contact. For more information please visit the SA Health website.

Follow the QR code to know more about accessing your free rapid antigen tests and registering your positive results.
