

GET DIPHTHERIA OUTTA HERE

**Skin sores or sore throat?
Visit your local health service.**

Diphtheria can make you very ill and may even put you in the hospital. It can spread easily between people if it's not treated.

It is important children have all their vaccines as soon as they're due.

- Cover coughs and sneezes
- Keep wounds clean and covered
- Clean household items and surfaces

For more information contact your local Aboriginal Health Service.
