## When is the test?

- Monday 27 July, 2026
- 1.30pm ACST
- Across South Australia

## What is happening?

Australia is testing AusAlert.

AusAlert is a new emergency warning system.

It sends urgent messages to compatible  
phones and devices.

## What might happen on my device?

Your phone or device may:

- Make a loud alert sound for about 10 seconds
- Vibrate
- Show a message on the screen
- Make a sound even if it is on silent or do-not-disturb

## What do I need to do?

This is only a test.

- Read the message
- You do not need to do anything else
- In a real emergency, follow the instructions in the alert

## **What if I do not get the alert?**

You do not need to do anything.

Your device may not be compatible or may not have been connected to a mobile tower at the time.

## **Need support or worried about the sound?**

If the test may cause stress or harm, you can switch your device off or switch it to aeroplane mode before the test.

Leave it off for at least 1 hour.
